Attentions

1. Please read this instruction manual carefully before use.
2. This remote control is designed to support the matching colorful fan, it will enter the remote control pairing mode (common code) automatically when it is turned on.
Anti-interference Setting: Long press the pink button on the left bottom of the remote control for three seconds, the light will flash three times in a row and will automatically enter the code matching mode, in this case, other remote control can't control the fans.
Clear Anti-interference Setting: Long press the white button on the right bottom of the remote control for three seconds to clear the Anti-interference Setting, in this case, other remote control from our factory also can control this colorful fan.
3. Pls make sure that the power cable cannot be inserted in the wrong position. Insert it according to the Power access port identification on the panel.

* Warm note: Please check if there is a short circuit in the power cord before connecting the power supply. Waiting for 1-2 minutes after power on, make sure there is no short circuit.
