## INTEL LGA1155/1156/775 Installation
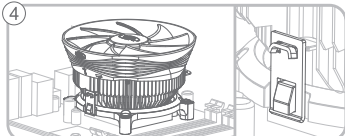

①

Evenly apply a thin layer of thermal grease onto the processor.
将导热膏均匀涂在CPU表面。

②
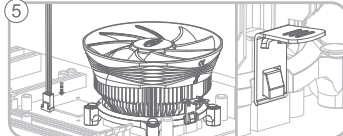

LGA1155/LGA1156 Mounting Holes

LGA775 Mounting Holes

Attach the mounting bracket onto motherboard by inserting the clips into the right holes according to socket type.
用下扣穿过相应孔位将转接架固定至主板。

③

Press the push-pins into the clips and secure the mounting bracket.
将上扣穿过下扣压紧，将转接架锁至主板。

④

As illustrated, put the heatsink onto the processor and hook the vertical clip onto the retention frame tab.
将散热器放在CPU上，然后按图示方法，用扣具直勾端勾住I2A转接架的一端。

⑤

Press down the other side clip and hook it onto the tab, too. And then finish the installation by connecting the fan cable to the motherboard.
用扣具手柄端勾住I2A转接架的另一端，扣紧扣具；然后将风扇电源接入主板。
