Dear Customer,

Thank you for choosing our products.

We are pleased to offer you appliances and devices designed and manufactured to the highest standards of quality, functionality, and design. Before using the device, please read this manual carefully. It contains important information regarding your safety, as well as recommendations for the proper use and care of the product. Please keep this manual in a safe place and use it as a reference guide during future operation of the product.

Intended Use

The straightener is designed for curling, straightening, and styling hair.

Safety Precautions

- Before connecting the device to a power source, ensure that your home electrical network parameters match its technical specifications.
- Plug the device only into a grounded outlet.
- Do not use the device in the immediate vicinity of water sources. Never expose the device to running water or immerse it in water. Proximity to water poses a risk even if the device is turned off.
- Do not use the device with wet hands. This may result in electric shock or damage to the device.
- Unplug the device after use and before cleaning. Disconnect the device by grasping the insulated plug, not by pulling the cord itself.
- Do not pull or move the device by the cord. Do not bend or wrap the cord around the device. Ensure the power cord does not bend over the edge of the countertop or come into contact with hot surfaces or sharp edges.
- Do not turn on the device when its plates are closed. Be sure to open them before turning on.
- Do not leave the device plugged in and unattended.
- Before storing the device, allow it to cool down.
- Place the hot device only on a heat-resistant, stable, flat surface. Keep it away from flammable objects and materials.
- Never cover the device (e.g., with a towel or clothing) while it is hot.
- Be cautious when handling the device, as some parts may become extremely hot during operation. Hold the device only by the handle and avoid contact of hot parts with skin.
- Be careful: if hair styling products come into contact with the plates, smoke may appear, and the product may burn and damage the plates.
- Selecting an inappropriate temperature for your hair may lead to damage and dryness. Prolonged contact of the plates with hair may cause hair ignition.
- The device heats up to the set temperature quickly, but cools down significantly slower.
- Immediately disconnect the device from the power source in case of malfunction. Do not turn on the device if there are visible signs of damage, or if the power cord or plug is damaged.

- Do not disassemble the device yourself to avoid electric shock. This device contains no user-serviceable parts. Maintenance and repairs should only be performed by qualified technicians at an authorized service center.
- This device is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the device.
- This device is not intended for commercial use.

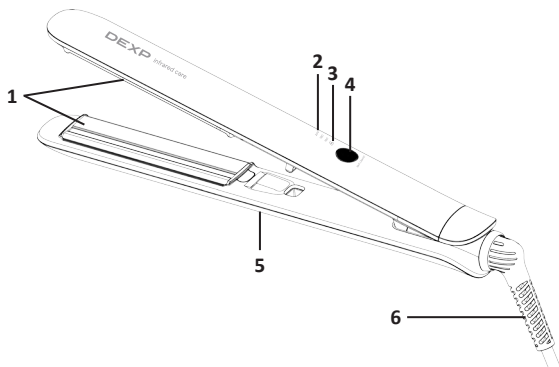

Specifications

- Model: HST-998.
- Trademark: DEXP.
- Power: 40 W.
- Power supply: 110–240 V ~ 50–60 Hz.
- Plate coating: Ceramic-tourmaline.
- Dual ionization: Ion generator and tourmaline.
- Plate size: 25 × 100 mm.
- Heat settings: 160 / 180 / 200 °C.
- Floating plates.
- Infrared heating.
- Overheat protection.
- Auto shut-off.
- Rapid heating.
- Rotating cord.
- Cord length: 2.1 m.
- Protection class: II.
- Cord type: Y.
- IP code: IPX0.
- Scope of application: Domestic.

Package Contents

- Device.
- User manual.

Device Diagram

1. Heating plates.
2. Temperature indicators.
3. Device lock indicator.
4. Power button.
5. Plate lock switch (on the back of the device).
6. Power cord.

Operating Instructions

Operation

CAUTION: When using the device for the first time, select the lowest temperature.

1. Connect the device to the power source.
2. Press the power button. The 200 °C indicator will start flashing.
Note: 200 °C is the default temperature.
3. To change the temperature, press the power button. The indicator of the selected temperature will flash.
4. The device will start heating up, and the ionization will also turn on.
5. When the appliance is heated up, the selected temperature indicator will stop flashing and remain steadily lit.
6. After finishing styling, press the power button and disconnect the appliance from the power supply.

Straightening Hair

Once the plates have heated up to the selected temperature and the indicator stops flashing, you can begin styling.

1. Divide your hair into strands approximately 4 cm thick.
2. Take the first strand and place it between the plates. Start straightening from the roots.
3. Close the plates and slowly glide the straightener from the roots to the ends of the hair. Repeat these steps with other strands until the desired result is achieved.
4. After styling, allow your hair to cool down, then comb it through.
5. Always turn off the device immediately after use: press and hold the Power button for 2–3 seconds.

Device Lock

In case of inactivity for 5 seconds, the power button will be locked. The «» indicator will light up.

To unlock the device, press the power button twice. The lock indicator will turn off, and the power button will become available again.

Plate Lock

A switch on the body of the straightener allows you to lock the plates in the closed position. To do so, close the plates and move the switch to the «» position.

To open the plates, move this switch to the «» position.

Auto Shut-off

The device will automatically turn off after 1 hour of inactivity.

Rules and Conditions for Installation, Storage, Transportation, Sale (Distribution), and Disposal

- This device requires no assembly or mounting.
- The device must be stored in its original packaging, on heated premises, both at the manufacturer's and at the consumer's sites. The ambient temperature should be between +5 °C and +40 °C, and the relative humidity should not exceed 80% (non-condensing). The storage area must be free from aggressive contaminants (e.g., acid or alkali vapors) that could cause corrosion.
- The device must be transported in a dry place.
- The device requires careful handling. Protect it from exposure to dust, dirt, impact, moisture, fire, and other hazards.
- Sale or distribution of the device must be carried out in accordance with local legislation.
- Upon expiration of the device's service life, it must not be disposed of with unsorted household waste. Instead, it must be taken to an authorized collection point for electrical and electronic equipment for subsequent recycling and disposal in accordance with federal or local legislation. By ensuring proper disposal of this product, you help conserve natural resources and prevent potential harm to the environment and human health that may result from improper handling. For more detailed information about collection and disposal points for this product, please contact your local municipal authorities or your household waste disposal service.
- If a device malfunction is detected, immediately contact an authorized service center or dispose of the device.

Warranty Information

The manufacturer guarantees the device will function properly throughout the warranty period and be free from defects in materials and assembly. The warranty period commences on the date of purchase and applies to new products only. Warranty service includes free repair or replacement of defective parts that fail during the warranty period, provided the failure is not caused by consumer misuse and the product is operated in accordance with the user manual. Repairs or part replacements shall be performed at authorized service centers.

Warranty Period: 24 months.

Service Life: 24 months.
