Dear Customer,

Thank you for choosing our products.
We are pleased to offer you products and devices designed and manufactured to the highest standards of quality, functionality, and design. Before using the product, please read this manual carefully. It contains important information regarding your safety, as well as recommendations for the proper use and care of the product. Please keep this manual in a safe place and use it as a reference guide during future operation of the product.

Intended Use

The universal power adapter is designed to power laptops and nettops.

Safety Precautions

- This device is not intended for use by children or persons with reduced physical, sensory, or mental capabilities, unless they are supervised by a person responsible for their safety. Do not allow children to play with the device.
- Do not cover the adapter or place foreign objects on it.
- The adapter must not be left hanging when connected to a laptop. Place the adapter on a flat, stable surface.
- Protect the device from exposure to moisture, various liquids, and heat sources.
- Do not disassemble the device yourself to avoid electric shock. This device contains no user-serviceable parts. Maintenance and repair must be performed only by qualified specialists at an authorized service center.
- Do not expose the device to prolonged extreme temperatures.
- Keep the device out of the reach of children.
- Use this device only for its intended purpose.

- Immediately disconnect the device from the power supply in case of malfunction or damage. Contact an authorized service center.
- When disconnecting the adapter from the device, hold the cable connector, not the cord, to avoid damage.
- The adapter may become warm during operation. This is normal and does not indicate a malfunction.
- This device is not intended for commercial use.

Specifications

- Model: ADF-TA06A0.
- Trademark: FinePower.
- Compatible devices: Laptops, nettops.
- Input power parameters: 200–240 V ~ 50–60 Hz, 1.5 A.
- Power: 65 W.
- AC cable length: 1 m.
- DC cable length: 1 m.
- Number of connectors: 6 pcs.
- Protection against: Overvoltage, overload, overheating, short circuit.
- Protection class: II.
- IP code: IP20.
- Cord attachment type: X.
- Scope of application: Domestic.

Package Contents

- Connectors (6 pcs).
- Power adapter.
- Power cord.
- User manual.

Connectors

Connector	Compatibility	Power parameters	Dimensions
M5	IBM, LS, DELL, COMPAQ, HP, DELTA, TOSHIBA, LITEON, GATEWAY, NEC	19 V ⎓ 3.42 A	5.5 × 2.5 mm
M13	TOSHIBA, ACER, DELTA	19 V ⎓ 3.42 A	5.5 × 1.7 mm
M28	LENOVO Ultrabook	20 V ⎓ 3.25 A	11 × 4.5 mm
M30	ASUS	19 V ⎓ 3.42 A	4 × 1.35 mm
M31	HP Envy	19.5 V ⎓ 3.33 A	4.5 × 3 mm
M34	LENOVO	20 V ⎓ 3.25 A	4 × 1.7 mm

CAUTION! Before attaching a connector, ensure that it matches the device's power port and required operating voltage.

Selecting a Connector

1. Find information on the old adapter or the device.
   - Output voltage (V) — must match the voltage specified on the original adapter or device, with a permitted deviation of ±0.5 V.
   - Output Current (A or mA) — must be equal to or higher than that of the old adapter.
2. It is necessary to check the connector for the power port. The old and new ones must completely match in size and shape (right-angle or straight — there is no difference).
3. Ensure that the polarity matches the polarity of the old adapter. It is usually depicted on its housing.

Operating Instructions

1. Select a connector compatible with your laptop's power port and attach it to the DC output cable. The number indicated on the connector corresponds to the adapter's voltage.
2. Insert the power cord into the adapter.
3. Connect the power cord to the power source.
4. Insert the connector into the device's charging port.

Rules and Conditions for Installation, Storage, Transportation, Sale (Distribution), and Disposal

- The device does not require installation or permanent mounting.
- The device must be stored in its original packaging, on heated premises, both at the manufacturer's and at the consumer's sites. The ambient temperature should be between +5 °C and +40 °C, and the relative humidity should not exceed 80% (non-condensing). The storage area must be free from aggressive contaminants (e.g., acid or alkali vapors) that could cause corrosion.
- The device must be transported under dry conditions.
- The device requires careful handling. Protect it from exposure to dust, dirt, impact, moisture, fire, and other hazards.
- Sale or distribution of the device must be carried out in accordance with local legislation.
- Upon expiration of the device's service life, it must not be disposed of with unsorted household waste. Instead, it must be taken to an authorized collection point for electrical and electronic equipment for subsequent recycling and disposal in accordance with federal or local legislation. By ensuring proper disposal of this product, you help conserve natural resources and prevent potential harm to the environment and human health that may result from improper handling. For more detailed information about collection and disposal points for this product, please contact your local municipal authorities or your household waste disposal service.
- If a device malfunction is detected, immediately contact an authorized service center or dispose of the device.

Warranty Information

The manufacturer guarantees the device will function properly throughout the warranty period and be free from defects in materials and assembly. The warranty period commences on the date of purchase and applies to new products only. Warranty service includes free repair or replacement of defective parts that fail during the warranty period, provided the failure is not caused by consumer misuse and the product is operated in accordance with the user manual. Repairs or part replacements shall be performed at authorized service centers.

Warranty Period: 18 months
Service Life: 18 months
