Surge Protector

Oriol 519W, Oriol 519B, Oriol 530W, Oriol 530B, Oriol 550W, Oriol 550B

User Manual

Intended Use

The surge protector is designed for connecting electrical devices in locations remote from fixed power outlets.

Safety Precautions

- Do not use the device outdoors.
- Do not use the device near sources of water or other liquids. Never place the device under running water or immerse it in water.
- Do not cover the surge protector or place any objects on it.
- Keep the device away from powerful heat sources.
- Do not disassemble the device yourself to avoid electric shock. This device contains no user-serviceable parts. Maintenance and repairs should only be performed by qualified technicians at an authorized service center.
- Do not use the device if visible damage is detected. Unplug it immediately and contact an authorized service center.
- This device is not intended for commercial use.
- This device is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the device.

Specifications

Trademark	FinePower

Power cord length	1.9 m	3 m	5 m
Number of sockets	5 pcs		
Power supply	220–230 V ~ 50–60 Hz		
Max. connected load power	2300 W		
Max. load current	10 A		
IP code	IP20		
Protection class	I		
Scope of application	Domestic		

Package Contents

- Surge protector.
- User manual.

Operating Instructions

1. Connect all necessary devices to the surge protector.
2. Plug the surge protector into the wall outlet.
3. Switch the surge protector to the “On” position.

Rules and Conditions for Installation, Storage, Transportation, Sale (Distribution), and Disposal

- This device requires no assembly or mounting.
- The device must be stored in its original packaging, on heated premises, both at the manufacturer’s and at the consumer’s sites. The ambient temperature should be between +5 °C and +40 °C, and the relative humidity should not exceed 80% (non-condensing). The storage area must be free from aggressive contaminants (e.g., acid or alkali vapors) that could cause corrosion.
- The device must be transported in a dry place.
- The device requires careful handling. Protect it from exposure to dust, dirt, impact, moisture, fire, and other hazards.
- Sale or distribution of the device must be carried out in accordance with local legislation.
- Upon expiration of the device’s service life, it must not be disposed of with unsorted household waste. Instead, it must be taken to an authorized collection point for electrical and electronic equipment for subsequent recycling and disposal in accordance with federal or local legislation. By ensuring proper disposal of this product, you help conserve natural resources and prevent potential harm to the environment and human health that may result from improper handling. For more detailed information about collection and disposal points for this product, please contact your local municipal authorities or your household waste disposal service.
- If a device malfunction is detected, immediately contact an authorized service center or dispose of the device.

Warranty Information

The manufacturer guarantees the device will function properly throughout the warranty period and be free from defects in materials and assembly. The warranty period commences on the date of purchase and applies to new products only. Warranty service includes free repair or replacement of defective parts that fail during the warranty period, provided the failure is not caused by consumer misuse and the product is operated in accordance with the user manual. Repairs or part replacements shall be performed at authorized service centers.
Warranty Period: 24 months
Service Life: 48 months
